## **DETAILED ACTION**

### ***Allowable Subject Matter***

The indicated allowability of claims 1 – 40 and 69 – 74 is withdrawn. A new rejection follows.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 – 40 and 69 – 74 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims merely setting forth physical characteristics desired in article, and not setting forth specific compositions which would meet such characteristics, are invalid as vague, indefinite, and functional since they cover any conceivable combination of ingredients either presently existing or which might be discovered in future and which would impart desired characteristics. Ex parte Slob (PO BdApp) 157 USPQ 172.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 40 and 69 – 74 are rejected under 35 U.S.C. 102(b) as being anticipated by Yang.

With reference to claims 1 – 40 and 69 – 74, Yang discloses an absorbent article comprising a core comprised of pulp (col. 4, lines 59 – 60) and is comprised of about 50% by weight of substantially homogenous superabsorbent material as set forth in col. 6, lines 43 – 44. The absorbent article is fully capable of being used as a night time diaper, a travel diaper and/or an extended use diaper.

Based on the foregoing in light of the claimed invention, one can reasonably assume that the absorbent article of Yang would inherently provide the claimed test characteristics if subjected to a procedure identical to that disclosed by applicant.
